MASTBOLIN 100MG

Drostanolone Propionate 100mg

PRODUCT INTRODUCTION

Mastebolin is an exotic androgenic compound of the Dihydrotestosterone group. Being that this compound comes from Dihydrotestosterone or DHT, it does not Aromatize. Because of this benefit, many bodybuilders use it to prevent the Aromatization of other anabolic compounds..

USES OF MASTBOLIN 100MG

Enhancing muscle definition and hardness

Improving strength and endurance

Achieving a more shredded and vascular appearance

We Build Happiness for you

BENEFITS MASTBOLIN 100MG

One of the most noticeable effects of Drostanolone is the way that it improves the hardness of your muscles. This is ideal for bodybuilders and athletes who are interested in developing a better physique. It is also known for making people appear more 'filled out' by increasing muscle density.

SIDE EFFECTS MASTBOLIN 100MG

Acne

Breast enlargement

Injection site pain

Depression

Frequent erections

Hair growth

Headache

Mood swings

Nausea

HOW TO USE MASTBOLIN 100MG

The recommended dosage for beginners is typically 200-300 mg per week, while experienced users can increase it to 400-600 mg per week. The cycle duration is usually 6-8 weeks.

HOW MASTBOLIN 100MG WORKS

Drostanolone propionate, via its active form drostanolone, interacts with the AR and activates a cascade of genetic changes, including increased protein synthesis (anabolism) and decreased amino acid degradation (catabolism).

SAFETY ADVICE

Alcohol
