Poxet 30 Dapoxetine is a medicine used specifically for treating PE premature ejaculation in adult men.

USES OF POXET-30

·For treating erectile dysfunction

We Build Happiness for you

BENEFITS OF POXET-30

Poxet-30 TABLET works by increasing the level of a chemical called serotonin in the brain. This increases the time taken to ejaculate and improves control over ejaculation. This helps reduce any frustration or worry that you may have due to quick ejaculation and improves your confidence. It is usually taken 1 to 3 hours before sexual activity is anticipated. Do not take this medicine more than once a day.

SIDE EFFECTS OF POXET-30

- Drowsiness
- Nausea
- Tremors
- Vomiting
- Dizziness
- Erectile dysfunction
- Fatigue
- Headache
- Increased sweating
- Indigestion
- Restlessness
- Insomnia (difficulty in sleeping)
- Eye pain
- Agitation

HOW TO USE POXET-30

Take this medicine in the dose and duration as advised by your doctor. Swallow it as a whole. Do not chew, crush or break it. Poxet-30TABLET may be taken with or without food, but it is better to take it at a fixed time.

HOW POXET-30 WORKS

Poxet-30 TABLET is a selective serotonin reuptake inhibitor (SSRI) which increases the level of serotonin in the nervous system to increase the time taken to ejaculate and improve control over ejaculation.
