TURINABOL

4-CHLOROWPHYDROMTHYLTESTOSTERONE 10MG

PRODUCT INTRODUCTION

Chlorodehydromethyltestosterone, the generic name for the more recognized brand Oral Turinabol, is a potent derivative of Dianabol. This oral steroid is structurally a cross between methandrostenolone and clostebol (4-chlorotestosterone), having the same base structure as Dianabol with the added 4-chloro alteration of clostebol.
